***Notes to Part A – Information relating to available gas and EOI's**

- This form is submitted for each Supplier in the Senex Group (i.e. Senex Assets Pty Ltd, Senex Assets 2 Pty Ltd and Stuart Petroleum Cooper Basin Gas Pty Ltd) and the reported "Available Gas" for is the aggregate for these entities (i.e. is a portfolio total number).
- This information is accurate at 1/4/2024 and is subject to change.
- Total uncontracted volumes are subject to a final investment decision, which has not been made and is entirely subject to the successful and timely finalisation of regulatory approvals. If the required federal environmental approvals (under the EPBC Act) are not granted by 30 June 2024, there is a real risk that these volumes will no longer represent the volumes of uncontracted gas that are likely to be available in the 24-month period.
- Volumes depend on forecasts of supply which are built on assumptions around construction timelines (including approvals) and well, facility and buyer requirements as well as other factors.
- Volumes depend on forecasts of contracted demand at 1/4/2024. Under some contractual arrangements flexibility may be exercised under terms including MDQ/Load Factor/banking and other rights as well as Take or Pay. This may impact the volumes of available gas on a specific day and/or over the 24-month reporting period.
