

Welcome to Senex Energy's first *Quarterly Update* of the year!

Q1 2025

This update shares with you our latest project progress, what's on in the community and how a real and lasting difference can be made to the livelihoods of average Australians.

## Expansion project

Senex's newly opened Atlas compression facility will deliver sorely needed gas to Australia's east coast

### First gas at Senex's Atlas compression facility!

Australian manufacturers and households can count on reliable natural gas from Senex's Atlas expansion in Queensland's Surat Basin with first gas now flowing to the domestic market.

Senex customers like glass manufacturer Orora have begun receiving reliable and secure natural gas as part of their decade-long supply deal with Senex to support their manufacturing operations and decarbonisation ambitions.

Senex is proud our expansion is:

- creating **700 construction jobs** and **200 ongoing**
- spending **95 per cent of the \$1 billion project** within **Australia** and **half within Queensland**
- injecting **\$200 million** into **Surat Basin businesses and communities**
- **paying royalties** to help fund **hospitals, roads, emergency services** and more
- delivering **much needed natural gas** supply for households and manufacturers on the east coast.

via the QR code.

## WHAT'S ON in the community

Wandoan is smiling ear to ear following a visit from the Royal Flying Doctor Service (RFDS) dental truck.

The visit is part of Senex's three-year partnership with the RFDS to provide much-needed free dental health services in Wandoan.

The visit saw:

- more than **1,200 dental treatments delivered**
- **one in three Wandoan residents receive free and local dental care, including more than 45 children**
- Wandoan State School students in grades three and four receive an RFDS oral health education session.

It's been heartening to see local families accessing dental care without needing to travel hours away. This is just one way Senex is giving back to the community that has given us so much.

Natural gas powers the average Aussie's way of life

## The 'Average Australian'

At this week's [Australian Domestic Gas Outlook \(ADGO\)](#) conference, Senex Energy CEO Darren Stevenson [made the case](#) that the 'average Australian' - a 39-year-old female with a partner and two kids who lives in our capital cities - was reliant upon and benefited from the essential energy supplied by natural gas.

He made the case that as a nation, we owed it to average Australians to keep supporting business investment in reliable energy supply.

A real and lasting difference can be made to the livelihoods of average Australians by encouraging investment in more gas supply to avoid the impending shortfalls.

Senex is [calling on government](#) to [unlock the reserves](#) for the

domestic market that are currently locked up to help improve energy reliability and affordability.

We are also calling for the streamlining of regulatory approvals by removing the duplication in state and federal environmental approvals processes.

This is the only way we'll find our way back to affordable energy.

With natural gas sitting right here in the sensible centre of our lives and politics, there has never been a more important time to get this right.

Senex Energy is ready to play its part and lend a hand in 'delivering that essential energy for life' Australians rely on.

A render of the new Brisbane Olympic stadium proposed for 2032

## Did you know?

*Stadium Australia (now known as Accor Stadium) was Australia's last purpose-built Olympic stadium constructed with **12,000 tonnes of structural steel** and **10,000 tonnes of reinforcing steel**, and designed to host 110,000 spectators in the heart of Sydney.*

Construction of the stadium also required **90,000 cubic metres of concrete** and a **million masonry concrete blocks**.

**Gas is an irreplaceable high-heat source** in the manufacturing process of **steel, bricks and cement** – without these products we could not build new stadiums.

Queensland Premier David Crisafulli has just announced Brisbane will receive a new stadium for the 2032 Brisbane Olympic Games that is sure to require thousands of tonnes of Australian steel, bricks and cement manufactured by Australian natural gas.

### Find out more about Senex

Senex is a world-class supplier of reliable and secure natural gas - committed to delivering essential energy for life. The energy we proudly provide is essential to our modern lives and for the thriving communities we serve. If you would like more information, have any questions or comments, please get in touch.
